Important

PLEASE READ BEFORE ORDERING

Please print your full Name and Street Address.
also City and State, in Capital Letters on all orders.

Many orders are received without sufficient address, causing delay and dissatisfaction. Please use order blank in Catalog when possible.

Because of ever-increasing postal costs, please add 45c on all plant orders amounting to \$3.75 or less. On all orders over \$3.75, add 65c; west of the Mississippi, add 85c. No C.O.D.'s, please. Send money order or personal check.

PLEASE DO NOT SEND CASH. WE CANNOT BE
RESPONSIBLE FOR CASH SENT IN MAILS.

Penna. customers please add 4% sales tax.

Canadian customers must secure an import permit from your Dept. of Agriculture. Forward to us with your order. Postage at your cost.

Write for further details on foreign shipments.

If your order arrives damaged or crushed: Report immediately to your postal clerk or department and have a bad order report filled out. We can place no damage claim without it. Please be prompt in doing this on arrival of a damaged order. Send the report along with your complaint, and a prompt adjustment or replacement will be made. The postal department does not recognize any frozen claims. There is no insurance to protect a loss of this kind; only damaged and broken claims are honored.

We ship the year round when possible. During freezing weather orders are acknowledged and booked. Allow a reasonable time for delivery. All accessories are sent postpaid.

Your order is selected from young, vigorous stock 2 to 5 inches high at bud or blooming stage. All plants are grown and shipped from our greenhouses in 2¼-inch plastic pots.

With our large selection of varieties, certain popular kinds sometimes become scarce. Rather than ship another plant of our own choice, we prefer you to mention a second choice. Many times prices are subject to change without notice, and we may use these substitutes to give you the lower price benefit.

Our reference: The First Pennsylvania Bank & Trust Co., Huntingdon Valley Branch, Huntingdon Valley, Pa.

A friendly "Hello" to our friends from Frank and Anne Tinari. Please make yourself at home, either in our showroom or through our catalog. May we remind you there are many fascinating ways violets can be used to complement your home or office decor. Note the violet jar, in color, (on back cover) planted with new Tinari Originations: Pink Parfait, Lilian Jarrett, Purple Splendor, Fireball.

EPISCIAS

When Ordering Please State Second Choice

These beautiful plants are members of the African Violet family. They will provide variety and add interest to your collection. (PLEASE STATE SECOND CHOICE.)

CHOCOLATE SOLDIER—Fascinating striped leaf—green markings on bronze-copper. Red flower. \$1.00

COCCINEA—Dark velvety bronze leaf with bright green vein markings. Red flower. \$1.00

FANNY HAAGE—Velvety bronze leaf with light green veining. Blue flower. \$1.00

PINKISCIA—This new variety has a shocking pink blossom. Very striking against dark bronze foliage. \$1.00

SILVER SHEEN—Striped silver-gray on shiny medium green leaf. Red flower. \$1.00

TROPICAL TOPAZ—A new and exotic episcia with true yellow blossom, plain light green shiny foliage. \$1.00

A BETTER WAY TO DISPLAY YOUR AFRICAN VIOLETS.

New! Creatively designed

VIOLETREE

Delightful gift for violet
and plant hobbyists

Now you can own an artistically designed "VioletTree" to hold your choice plants in neat, space-saving order. Sturdy steel construction. 56½ in. tall, 25 in. in diameter. 21 in. from floor to first arm and cup. Well-balanced, neatly finished legs with rubber tips. Arms revolve and can be placed at any angle. The holders are cups, 3½ in. wide x 1½ in. deep, of heavy durable black plastic. Suitable to hold 2¼ or 3-in. pots and 4-in. standard size.

VioletTree stand in antique black or silver color finish.

(Please state color choice.)

21 cups. \$23.95, postpaid.

25 cups, \$25.95, postpaid.

MIDGET VIOLETREE

A Catalog Specialty!

Holds nine plants; measures 17 in. tall, 14 in. in diameter. Cups neatly in proportion to stand, 2¾ in. across by 1½ in. deep, to hold 2¼-in. or 3-in. pots, without the necessity of saucers.

Rubber-tipped, balanced legs. In antique black or silver color finish. Please state choice. \$7.95 each, postpaid.

FLUORESCENT GROWING LAMPS

Provide direct downward rays of light to make a symmetrical, well shaped plant — thus eliminating the chore of daily turning. With this controlled light your plants are able to complete the important functions of photosynthesis, that is: create the starch and sugar necessary for plant life. With fluorescent light your plants obtain balanced regularity. With the flick of a switch you provide the ideal growing light.

JUNIOR GROWING LAMP—Top in dark leaf green or wrought iron black. Aluminum legs. Height—14", length—26", width—10". PLANT AREA 18" x 28" with additional space on either end for low light growing. One 20 watt tube included.

Complete With 20-Watt Tube \$12.75 ppd.

ADJUSTABLE GROWING LAMPS—Grow tall or short plants with more light. Top is easily raised or lowered on tubular aluminum legs. Each lamp adjustable from 1"—20". Overall height 24", width 12". Top in leaf green or iron black. Complete with 2 fluorescent tubes, switch, cord and plug.

Junior Model (28" long) Shipped Parcel Post \$19.75

Senior Model (42" long) Shipped Parcel Post \$24.50

ADJUSTABLE FLUORESCENT GROW-LITES

Grow African Violets and other house plants with one or more of these economical reflector lights.

GROW-LITES may be used with bench stands that are easily adjustable to proper height, or suspended by a chain or hook. (Color: Dark Green Enamel.)

All GROW-LITES complete with switch, cord and plug. (less tube)

30 watt size (36" long) \$8.95 ppd.

40 watt size (48" long) \$9.95 ppd.

Bench Stands (2) — \$2.95 ppd. (Adjustable from 12" to 22")

Bench stands accommodate two GROW-LITES

ACCESSORIES TO HELP KEEP YOUR PLANTS IN GOOD GROWING CONDITION TINARI'S CERTIFIED AFRICAN VIOLET SOIL

Especially prepared, blended and sterilized for house culture of the lovely African Violet. It contains all the finest basic materials most essential to good Saintpaulia culture.

This soil has been treated to control most nematodes, soil insects, root rots, wilts and weed seeds, also undesirable soil organisms such as eel worms commonly found in most soils, harmful soil fungi, and other forms of bacteria that prevent good growth and blooms on your plants.

2 lb. bag 60c, plus 30c for mailing — West of Miss. 60c.

5 lb. bag \$1.00, plus 40c for mailing — West of Miss. 80c.

100 lbs. \$10.00, F.O.B. Bethayres, Pa. Soil packed in 25 lb. Polyethylene bags.

Can ship Express or Freight. Charges collect.

HYPONEX PLANT FOOD. An odorless, economical, powdered plant food for African Violets. Does not lose its vitality. Directions on every package. 2-ozs. 29c; 5-oz. can 59c; 10-oz. can \$1.25, all postpaid.

LIQUA-VITA PLANT FOOD. A highly concentrated fertilizer with plant hormones and Vitamin B₁ in liquid form. Non-acid-forming; excellent for African Violets and all other house plants. 8-oz. bottle 75c, postpaid.

OPTOX VIOLET SPRAY. Control cyclamen mite, mealy-bug, thrips and other common diseases of African Violets and other plants. 1-oz. bottle 60c; 6-oz. bottle \$1.35; 1-pt. bottle \$2.50, all postpaid.

V C 13. A new nemacide especially created for control of nematodes. Mixes easily with warm water to treat your African Violets. 8-oz. bottle \$2.10, postpaid. Manufacturers directions for use on bottle.

ANTROL HOUSEPLANT BOMB. New Antrol African Violet and house plant insect bomb releases a killing mist over plants. Kills tiny mealy-bugs, mites, aphids, exposed thrips, white flies, and other life-sucking parasites. Ready to use; no mixing, no pouring. \$1.25, postpaid.

SEL-KAPS. A sodium selenate capsule to control mites, mealy bugs, red spider, aphid, and other violet pests. 24 for \$1.25 postpaid.

PROLIFEROL POWDER. A well-balanced, scientific growth stimulant for treating Violet leaf cuttings before rooting. Encourages rapid root development. Pkg. 35c; 2-oz. jar \$1.35, postpaid.

VERMICULITE. An excellent rooting medium for house culture. Sterile heat treated to 2000° F. Generous size bag. \$1.25, postpaid. (State type wanted fine for rooting or coarse grade for plants to sit on.)

AFRICAN VIOLET SEED. Approximately 300 seeds to a package. Directions for sowing with every package. Crosses made with good standard varieties. Pkg. \$1.75, postpaid. Special Hybrid Crosses, pkt. \$3.50.

CARONex. Granulated charcoal. Keeps soil sweet and neutralizes water. 3 ozs. 25c; 7 ozs. 50c, postpaid with order. Separately, add 15c for each item.

WE ARE HAPPY TO ACQUAINT YOU WITH OUR SERVICES AS FOLLOWS:

Garden clubs or interested groups are cordially invited to tour our greenhouses under the guidance of Mr. and Mrs. Frank Tinari. Groups should consist of 15 or more people. Your chairman must make reservation for this free service in advance for a definite date.

Free color slides for African Violet Clubs can be secured from us free of charge. Arrangements for this service must also be made in advance due to constant demand.

GENERAL CULTURE

Plants are usually received in 2¼-inch plastic pots and should remain in them until they have become adjusted to your home atmosphere. Plants bloom best when they are pot-bound.

Always use sterilized, properly blended soil for re-potting. Our certified soil, which we ship to customers, is the same that we use for our tremendous growing stock of over 200,000 plants. Do not contaminate fresh, well-protected stock by using soil not suitably blended and sterilized.

A normal house temperature of 65° to 70° is most suitable. If your home is very hot and dry, we suggest that you grow Violets on pebble-filled trays, where you can create more moisture by keeping the pebbles moist at all times and by watering the plants individually at the top of the pot as needed or coarse Vermiculite can also be used in this manner.

North and west windows are best during the hot summer months, where plenty of light enters but not strong sunlight. South and east exposures give best results in winter.

Water plants when the soil feels only slightly moist to the touch. Do not allow plants to become thoroughly dry before watering them. On the other hand, do not allow them to become waterlogged, for this encourages crown rot, especially during the hot summer months. Use warm water, preferably rain water, distilled water or any that is free of chemicals. Frequency of watering depends upon size of pot, room, temperature, humidity and exposure. Plants can be watered from top or bottom.

Occasionally give plants a drink from the top, between stems, to keep the salts in the soil from accumulating at the top of the pot and forming a crust.

Make a practice of using an insecticide at least once a month as a preventive. No leaf-spotting will occur if foliage is allowed to dry thoroughly before plants are placed in sun or light. You may find evening the most convenient time to spray; in normal house temperatures leaves of plants will be dry before morning.

Violets received from our greenhouses have been grown here under careful conditions to combat diseases. We are state and federal certified, and we keep in effect a constant fumigation program. Plants are also treated with VC 13 as an extra precaution.

The pests that most often bother the home grower are mite and mealy-bugs. Both of these can be remedied in the early stages with the use of Optox Spray (20 drops to a pint of warm water), Antrol Bomb or Sel-Kaps. If plants become too badly infested, it is best to discard them for the protection of other plants that are healthy. Springtails, which are a fine, thread-like pest, can be controlled by using any preventive previously mentioned. Nematodes are small round worm-like animals that enter plants through roots, cause a swelling of the roots, stems or leaves and eventually result in an injury known as root knot. The best means of controlling them is by using sterilized soil to prevent contamination or the new VC 13 now available. Plants badly infested should be discarded.

When buds fall off or do not last long enough to develop, there may be a number of reasons: too dry an atmosphere or lack of humidity; the effect of gas fumes; not enough sunlight and good air circulation; overwatering; extreme changes of temperature and drafts; or leaving recently watered plants near a cold window overnight.

Stem rot is caused by fungi that enter the tissues of the plants and cause damage and death to cells. The only remedy for this type of rot is to use sterilized soil. And be careful not to overwater; waterlogged soil is the main reason for the attack by the fungi.

Plants should be fed at least twice every month if Violets are expected to perform at their best. A liquid food is perhaps the easiest to use. Liqua Vita is excellent. If you prefer a powdered food, Hyponex is a real favorite and is also very easy to use. Directions appear on every can. When preparing food for plants, mix only the amount to be used for one feeding.

Tinari Greenhouses

2325 Valley Rd. and Terwood Drive
One block North Route 63
BETHAYRES, PENNSYLVANIA
Telephone: WI 7-0144

Our greenhouses, with a capacity of over 200,000 plants, are devoted entirely to growing outstanding African Violets. This is not a side-line or a second crop at Tinari's. It is a specialty representing a life's work in growing the best in Violets and hybridizing and producing new varieties.

We extend a cordial invitation to you to visit our greenhouses. Our entire range is devoted exclusively to the growing of African Violets.

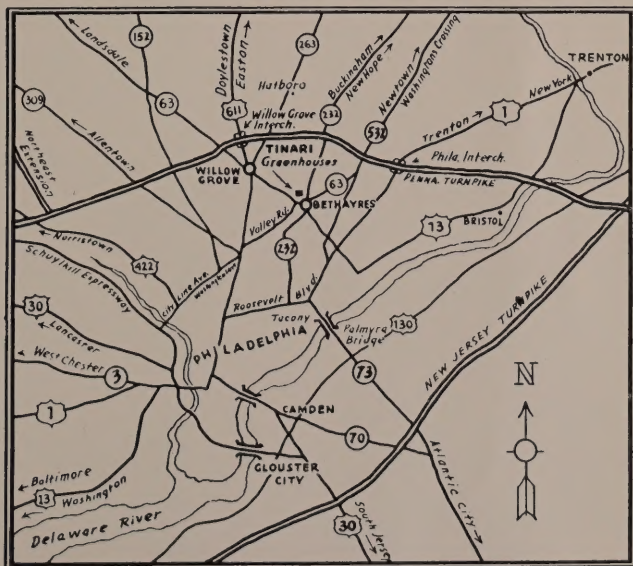

For your convenience we have assembled in one greenhouse groups of the many varieties we grow, in order to save you time and allow you to make variety comparison on sight. This showhouse offers you an excellent opportunity to become better acquainted with the new and standard varieties.

Our greenhouses are located in the picturesque valley of Bethayres, along the famous Pennypack Creek one mile from Bethayres (West of route 232, North or route 63). From the Willow Grove Interchange of the Pennsylvania Turnpike, take route 611 South to Willow Grove, left (East) on route 63 for 3 miles to Tinari Greenhouse sign, left one block.

Open daily from 8 A.M. to 5 P.M.; Sunday afternoon from 1 to 5 P.M. Evenings by appointment. Closed Thanksgiving Day, Christmas Day, New Years Day, 4th of July.
